

Enhance your research with CINAHL[®] *with Full Text* and its innovative feature the Plum[™] Print, and access the best article-level metrics available.

The convenient Plum Print widget allows CINAHL *with Full Text* users to track comprehensive metrics, helping them discover the hidden stories of research.

Drawing from the modern metrics measured by Plum[™] Analytics, the Plum Print widget can be indicated by any CINAHL *with Full Text* content with available metrics. Metrics found in the Plum Print are continuously updated and cover articles from over 3,500 of the premier journals found in full text or indexed in CINAHL *with Full Text* published from 2013 onward.

The Plum Print widget visually changes depending on the metrics found in each of the five categories — usage, captures, mentions, social media and citations — designed to help you make sense of the data.
