

Be the first to know about  
**CUTTING EDGE CLINICAL DEVELOPMENTS**  
with *DynaMed*®'s rapid alert system

The screenshot displays the DynaMed website interface. At the top, there is a navigation bar with links for Home, Recent Updates, E-Newsletter, Mobile, and Calculators. A search bar is prominently featured with a search button. The main content area shows a search result for "Upper respiratory infection (URI) in adults and adolescents". The result includes a date stamp: "Updated 2016 Mar 03 03:29:00 PM" and a brief description of the update. Below the title, there is a table listing the Topic Editor (Dean Scott Miner, MD), Recommendations Editor (Allen Shaughnessy, PharmD, M Med Ed, FCCP), and Deputy Editor (Alan Ehrlich, MD). A "Related Summaries" section lists several related topics such as "Upper respiratory infection (URI) in children", "Acute bronchitis", and "Streptococcal pharyngitis". On the right side of the page, a pop-up window titled "E-mail me when this topic has been updated." is visible, allowing users to set the frequency of alerts (e.g., "Once a day") and enter their email address (e.g., "doctor@hospital.com"). A "Create Alert" button is located at the bottom of the pop-up.

**Stay current** with breaking news and cutting edge clinical developments with updates from *DynaMed*, an evidence-based point-of-care tool.

**Sign up** for alerts linked to any topic of interest and receive an email notification when there is a notable change in clinical content.
