Important Message

Advanced Search

To construct a search:
1. Select one or more databases from the database selection area. Click Close Database Selection Area or Open Database Selection Area, as appropriate.
2. Enter a word or phrase in the first text-entry area and make the appropriate selection from the drop-down list.

When using the All - Smart Search query do not use truncation symbols or other special characters. The Wilson All - Smart Search query will automatically search those options. Simply type the word or phrase that you are interested in and click Start. The search results will automatically show the most relevant articles at the top of the list when the Sort by Relevance option has been selected.

(For examples of the All - Smart Search query, Keyword searches, Bound Phrase searches, and fielded searches, see Construct a Search Query.)

Within fields, select and, or, not, or any terms in the second entry area. You can also

Works Cited Report

**The H.W. Wilson Company/WilsonWeb**

Citation style: MLA (Modern Language Association), (http://www.mla.org/)

### Works Cited

Note: Academic institutions and other research organizations often have their own style preferences for citing articles and we recommend that researchers check with their institutions before citing articles. Also, review the Works Cited below for any add.

These are simplified adaptations.
